Professional Summary

Analytical and detail-oriented Full Stack Developer with a strong analytical foundation (B.Sc. in Mathematics). Specializes in building scalable enterprise web and mobile applications using Java, Spring Boot, Angular, Android (Java), and Flutter. Skilled in designing secure REST APIs, role-based access control systems, database optimization, and cross-platform mobile experiences.

Technical Skills

- Backend: Java, Spring Boot, Spring Security, JWT Authentication, REST APIs, Maven
- Frontend: Angular, TypeScript, HTML5, CSS3, Bootstrap
- Mobile: Android (Java), Flutter, Dart
- Database: MySQL
- Tools & IDEs: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Android Studio

Education & Training

Bachelor of Science (B.Sc.) in Mathematics

Chattogram College (National University) | 2018 - 2023

ISDB-BISEW IT Scholarship Programme (Round 68)

Diploma in Web and Mobile App Development (Spring Boot, Android, Flutter) | 2024 - 2025

Featured Projects

Nirapod Tax Management System

A comprehensive enterprise-level tax administration platform designed to digitize taxpayer management, income tax returns, VAT administration, audits, appeals, notices, payments, reporting, and administrative workflows.

- Tech Stack: Java, Spring Boot, Angular, Android, Flutter, MySQL, JWT Authentication
- Key Features: Taxpayer Registration & Management, Income Tax & VAT Returns, Audit Management, Role-Based Access Control, Payment Processing, and Reporting.

Personal Projects & Software Development

- Designed secure REST APIs with JWT token authentication and role-based authorization.
- Built responsive web layouts with Angular and cross-platform mobile apps with Flutter/Android.
- Integrated payment processing and notice management pipelines.

Key Achievements

- Developed a complete tax management platform (Nirapod) spanning web, Android, and Flutter clients.
- Built and documented secure REST APIs using Spring Boot.
- Completed the rigorous IT Scholarship Programme (ISDB-BISEW).
